ENERGY

Nuclear-readiness review findings expected in 2027-28

METI | 2026-10-07

Singapore plans an IAEA Phase 1 review in 2027, with findings in late 2027 or 2028 and public feedback afterward. The review assesses decision-making readiness.

Wood Mackenzie flags electricity-import delivery risks

Wood Mackenzie | 2026-10-07

Wood Mackenzie projects imports at 15% of generation in 2035. Approved low-carbon projects have not reached financial close, with permitting, financing and pricing obstacles remaining.

INFRASTRUCTURE

EMA tenders feasibility study for Tekong energy hub

Energy Market Authority | 2026-10-06

EMA's feasibility study covers a potential 200-hectare site for hydrogen-ready gas plants, an LNG terminal and low-carbon technologies. Consultant appointment is expected by mid-2027.

Parliament passes Digital Infrastructure legislation

The Online Citizen | 2026-10-07

Parliament passed licensing and efficiency frameworks for major data centres and cloud services. Thresholds differ across facilities and services; implementation dates and detailed conditions require subsequent instruments.

Autonomous-vehicle legislation planned for late 2027

Ministry of Transport | 2026-10-06

Singapore is developing autonomous-vehicle licensing and safety legislation, likely in the second half of 2027. Revenue passenger services still require safety assessments and LTA approval.

MDDI says current enterprise AI compute is sufficient

MDDI | 2026-10-06

Industry feedback and prices suggest sufficient compute for current enterprise needs, MDDI told Parliament. Future demand remains uncertain; policy supports domestic growth and diversified overseas access.

INTELLIGENCE

MAS sets phased AI risk-management expectations

Monetary Authority of Singapore | 2026-10-07

MAS issued risk-proportionate AI expectations covering third-party assurance and lifecycle controls. Sections 3-4 are due from 7 October 2027; Sections 5-6 by 7 October 2028.

Frontier-model access remains voluntary in Singapore

MDDI | 2026-10-06

MDDI says frontier-model access before deployment remains voluntary. Singapore is building evaluation capabilities, studying stronger safeguards for high-risk uses and retaining risk-based AI-agent controls.

RE:AI and SIT plan NVIDIA-powered campus AI testbed

Singapore Institute of Technology | 2026-10-08

Singtel's RE:AI and SIT signed an MoU for enterprise AI development and talent training, including a planned NVIDIA-powered campus testbed. Opening date and GPU capacity remain undisclosed.

ElevenLabs opens Singapore office with data residency

MDDI | 2026-10-08

ElevenLabs opened its Singapore office, entering Southeast Asia with local enterprise inference and storage residency. An official launch address confirms entry; investment and deployment scale remain undisclosed.
